

Iwaki City Reinforced Concrete Pedestrian Overpass

NEFMAC was used in the construction of this 5-span RC hollow-deck pedestrian overpass that is located in a difficult environment, constantly subjected to salt water spray from the ocean waves. The overpass is steel free--Nefmac was used in all parts of the overpass (deck, overpass supports and abutments) to reduce the life cycle cost.

- **Owner:**
Iwaki City
- **Location:**
Fukushima prefecture
- **Dimensions:**
Bridge length : 60m
Overall width : 2.8m
- **Materials:**
NEFMAC CR32-100p,etc
- **Application:**
RC hollow slab
Piers
Abutments
- **Completed:**
Dec '01
- **ACC Projects list:**
#171
