

Kasube Tunnel Construction for National Road 229 in Iwanai Town

The job site is at the seaside, on steeply sloping ground. Non-corroding, lightweight CFCC ground anchors were chosen as a means to counter the risk of salt damage, lighten the materials used, simplify the work and enhance work safety.

- **Owner:**
Hokkaido Regional Development Bureau
- **Location:**
Hokkaido
- **Dimensions:**
Anchor Length 15.0-27.0m (× 102)
- **Materials:**
LEADLINE GA-D8
LEADLINE GA-D10
(3-multi)
- **Application:**
Ground anchors
- **Completed:**
Jun 98
- **ACC Projects list:**
#120
